New Webpage for
New Pre-Award System

You may have heard by now that the University of Miami is embarking on a project, spear-headed by the Office of Research Administration (ORA) and in collaboration with UMIT, to replace the current Pre-Award system.

The new Grants & Agreements system will replace InfoEd, currently used for proposal development, proposal tracking, and finding funding opportunities. Implementation of the new system is targeted for June 2020.

We have launched a webpage with information regarding the project. The New Pre-Award System webpage contains the project timeline, project goals and governance, among other useful information. Please visit the New Pre-Award System page and use the links on the page to Share a Comment and subscribe to the Pre-Award System ListServ to receive regular updates about the project.

For additional information, please visit the ORA website at www.ora.miami.edu.

If you have any questions, please email us at ora-si@miami.edu.
