

Revised PCRFL, PCRF-S and new Outbound Subaward/Jackson Work Order Request

August 4, 2017

Revised PCRFL and PCRF-S

In anticipation of Workday, ORA has launched a revised PCRFL and PCRF-S.

- [PCRFL](#) has new fields added and/or changed to be consistent with Workday terminology and to aid in reporting.
- [PCRF-S](#) will be used in lieu of the PCRFL for non-competitive applications and progress reports.
- Outbound Subawards/Jackson Work Order Requests:
 - The PI/Department no longer need to provide Purchase Requisitions to ORA Post Award.
 - The PI/Department will complete the [Outbound Subaward/Jackson Work Order Request](#) and submit it with required documentation to ORA.
 - ORA will create, negotiate and execute the outbound subawards. Then, ORA will issue unique identifiers through Workday and distribute the fully executed subaward to the relevant parties.
- IRB/IACUC – Account/Award will not be setup without proof of protocol approval, as applicable.

For details about the Outbound Subaward process, visit the [Subcontracting to Another Entity](#) on the ORA website.

For details about the Jackson Work Order process, visit the [Submission and Negotiation Process](#) on the ORA [website](#).

If you have any questions, please email us at ora-si@miami.edu.
